

Which project will you fund?

There is a huge need for jobs in Egypt, and there is a huge need for solid waste recycling. Both of the programs you read about in the *PBS NewsHour* story help people work **and** help improve recycling.

Your committee has the responsibility of deciding which project will receive a \$25,000 grant to help the people of ONE of these projects. The money will allow them to work for another year, to serve more people, and to improve recycling in Egypt. Which project will you fund?

Fill out this short chart to help you compare and contrast the two projects:

	Laila Iskandar's school	Sherif el Ghamray's recycling program
How does it help with Egypt's huge need for <u>recycling</u> ?		
How does it help with Egypt's huge need for <u>jobs</u> ?		

Other things to consider:

- Do you think one program will make **more** difference for the good than the other program?
- Do you think one program **needs** the money more than the other program?

These are both great programs. But as you know, your committee can only fund ONE this year. Which one will you fund?

___Laila Iskandar's school

___ Sherif el Ghamray's recycling program

The millionaire who is donating the money wants you to explain these two things:

✓ WHY did you choose that program?

✓ If the OTHER program wants to apply for money NEXT year, what should they do differently – or add to their program – so that you would be more likely to fund their program next year?
